

Groundwater Regulation and New Source Approval
Feb 11, 2013

Article

Moderator, Alternative Water Resources for Southern California AGWA - AGWT Annual Conference, Ontario, CA, February 11, 2013

Shareholder Scott Slater will moderate a panel focused on both state law and local ordinances that govern the regulation of water sources in California. The type and level of oversight varies widely depending on the type of water resource and the County in which it is located. Where groundwater is involved, local regulation has recently assumed primacy. This panel will explore the jurisdictional variations in regulation as well as the latest innovations in groundwater management and monitoring.
