Santa Barbara, California

Rob Saperstein's practice is focused on water law and policy issues, primarily representing public entity water suppliers.

Rob counsels and advocates in both transactional and litigation settings. He provides strategic and legal guidance on matters pending before local agencies, the California State Water Resources Control Board, various regional water quality control boards, the California Public Utilities Commission and state and federal courts.

Rob is an expert on optimizing clients' rights in groundwater, surface water and recycled water development and management. Whether in litigation, transactions or on setting of public policy, his objective is creative, practical-minded solutions that maximize client interests.

For several years, Rob was a member of the Brownstein Executive Committee, co-chair of the Natural Resources Department, and California offices Managing Partner. Prior to its merger with Brownstein, Rob served as the Managing Partner of Hatch & Parent.

Practices

Energy & Natural Resources, NEPA/CEQA, Public Lands, Renewable Energy, Water

Representative Matters

- Protected Bottling Plant from interference by City Council resulting from pressure by non-profit groups adverse to bottled water industry.
- Trial counsel for one of California's largest shareholder-owned public water suppliers in complex litigation to adjudicate and control the water resources in the Santa Maria groundwater basin. The case involved more than 1,000 parties who rely on local water resources and two federally-owned reservoirs. After eight years of litigation, the case was resolved through a settlement stipulation among the vast majority of the parties, thereby providing legal certainty with respect to the use and management of the resource.
- Defended CEQA challenge to Spring Water agreement in trial and appellate courts. Provided NEPA, CEQA and land use compliance advice for project development including construction of bottling facility and construction of pipelines in federal forest land.
- Defended CEQA challenge to the City's renewal of its long-term Central Valley Project water supply contract in trial and appellate courts.
- Successfully settled reimbursement claim by water company against four major oil companies with no direct evidence of whose MTBE impacted the well.
