

FOREcast - Funding Opportunities for Renewable Energy, Volume 1
Nov 24, 2008

Article

FOREcast, Volume 1, November 24, 2008

This is the inaugural edition of *FOREcast*, a newsletter on funding opportunities for renewable energy, written by Brownstein's Renewable Energy Group. With this periodic newsletter, we hope to assist the clean technology community in funding the development and commercialization of clean technologies. *FOREcast* provides information on the types of projects funded by the federal and state governments, the types of funding instruments used, private companies' input to public agencies for clean tech support, trends in the public support of clean technology and funding awards.

Included in this first issue are details on Technology Investment Agreements (TIAs) and other key funding opportunities currently available through the Department of Energy.
