The Big Gulp: The Future of Groundwater Storage in the Los Angeles Coastal Plain
Jun 01, 2009

Article

Law & Water Column, American Water Works Association, June 2009
Attorneys in Brownstein's Water Group author the monthly "Law & Water" column in the American Water Works Association Journal. Each column provides valuable legal insight in the form of case summaries of interest to water utilities across the U.S.

June's column discusses a new agreement developed in California, known as the "Big Gulp," which would create a framework for underground water storage and recapture in the previously unused space of the Central and West Coast basins.
